**DETAILED ACTION**

***Claim Rejections - 35 USC § 102/103***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-45 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Arakawa et al. (USPN 4,027,134).

Arakawa et al. discloses an electrode for edm. The electrode is tungsten based including Cu 15 to 40% and ZrO<sub>2</sub> 0.5 to 10%. In addition, Y<sub>2</sub>O<sub>3</sub> and/or ThO<sub>2</sub> may be used. Powder particles are below 325 US standard mesh (less than 45 microns). The powders are mixed, sifted, molded and sintered.

Mesh size 325 which is less than 45 microns is well known in the art, however, it this is not known it is exhibited by Slabbokoorn et al. (USPAP 2007/0172914). It is the position of the examiner that less than 45 microns, inherently meets instant claims In addition, inter-particle size will be the same or less than particle size.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See US PTO-892.
